

## Mickleover Meadows, Derby

This project is ongoing and provides much needed help in preserving the habitat in this nature reserve.

Teams of offenders undertake a variety of activities including removing debris and rubbish from the pond, keeping the stream clear of weeds, recycling logs etc for use as wildlife shelters, clearing brambles and mowing paths through the wild meadow areas for dog walkers and others.

Being a nature reserve, tasks such as cutting back bushes and brambles are scheduled after the plants have flowered, and when no birds are nesting.
